

## SMART 6™

## Microwave + Infrared Moisture & Solids Analyzer

# Analyze any sample type 10x faster than with traditional drying systems.

The SMART 6 is the most technologically advanced moisture/solids/volatiles rapid analyzer available. The system features two major innovations, compared to other moisture analyzers: the ability to accurately analyze both wet and dry samples, and a significant reduction in sample drying times. These benefits are possible through the development of iPower® technology, which features a patented dual-frequency drying technique.

This unique energy source allows for analysis times now up to 10x faster than traditional IR (infrared) and halogen drying systems. Never before has a moisture analyzer been able to offer so much, with the fastest and most accurate analysis for any sample type.

### **Features**

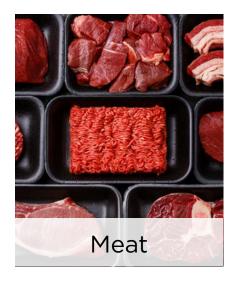

- Up to 10x faster than infrared and halogen systems
- Up to 40 % faster than CEM's SMART 5 Turbo
- · Analyze both dry and wet products on one system
- Pre-programmed methods for all sample types
- · Compact and lightweight for easy at-line placement
- · Analyze polar and non-polar solvents

### Validation

- · AOAC 985.14
- · AOAC 2008.06
- · AOAC PVM 1.2004
- · Title 21 CFR, Part 11

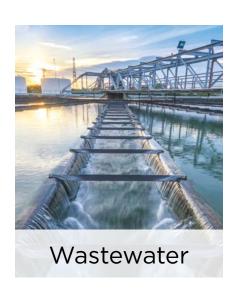

**Processed Foods** 

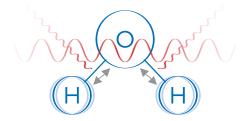

Adhesives	Cream Powder	Lamb	Resin
Bacon	Deli Chicken	Mayonnaise	Salmon
Black Liquor	Deli Ham	Milk	Sausage
Butter	Detergents	Mixed Foods	Sour Cream
Chicken	Dressings	Natural Cheese	TiO <sub>2</sub>
Chips	Dry Dog Food	Non-Fat Milk Powder	Turkey
Cod	Duck	Noodles	Wastewater
Condensed Milk	Egg Whites	Poultry Feed	Wheat Flour
Cosmetics	Ground Beef	Powdered Infant Formula	Whey Powder
Crackers	Heavy Cream	Processed Cheese	Whole Milk Powder
Cream	Hot Dogs	Processed Meat	Yogurt
Cream Cheese	Ice Cream Mix	Raw Pork	And many more

### **Unparalleled Speed and Technology**

### iPower<sup>®</sup>

Analyze wet and dry samples with unmatched speed.

iPower® is an innovative heating process based on the use of a dual-frequency energy source controlled by an intelligent processing system. This prevents burning or incomplete drying, which can arise from other drying technologies. The result is a direct method for virtually any type of sample, with faster drying than traditional microwave or infrared based systems.

- · Analyze wet and dry samples with unmatched speed
- · Eliminates surface burning
- · Little to no "cool down" time between tests

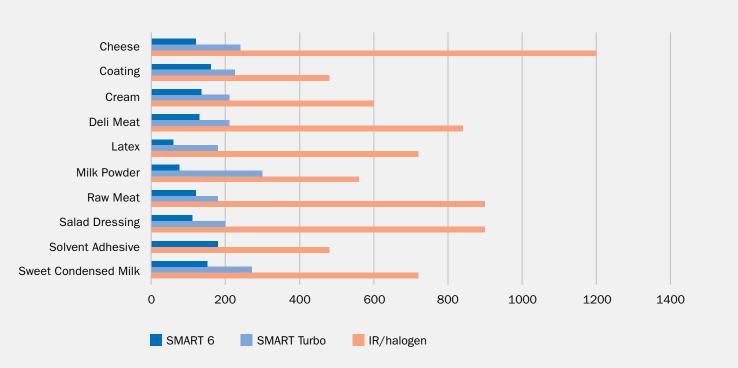

## Collimated Energy

Accurate and repeatable results come standard.

Stray infrared irradiation can negatively impact sample temperature readings with the use of infrared temperature sensors. SMART 6 has a unique honeycomb lattice, providing collimated infrared irradiation for sample heating, thereby avoiding stray light. This provides highly accurate temperature control.

## **Application Support**

## Pre-installed Method Library

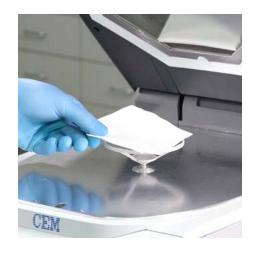

A simple touch is all it takes. Leave method development behind with SMART 6 One Touch Technology\*. Test virtually any sample with a library of ready-to-use methods at your fingertips.

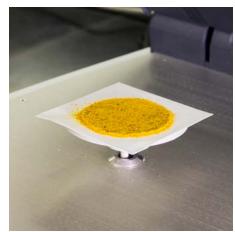

## Application support, when you need it.

The applications team at CEM has developed a library of method notes to guide you in programming methods. View them at **cem.com/methods**.

If no method note exists for your application, contact us at **process.support@cem.com** and we will be happy to develop one for you.
